**Lumberjack Mathematics Center: Past, Present and  
Future - the role of the LMC at NAU, the day-to-day  
work and the people contributing to its success**

Amy Rushall

Northern Arizona University

**Abstract**

Abstract: The Lumberjack Mathematics Center (LMC) is home to four first-year mathematics courses taught in a modified emporium style by faculty and Graduate Teaching Assistants of the Department of Mathematics and Statistics. We will look at a small history of the LMC, what the LMC looks like this year, and what we are working on for the future. In addition to our routine work, we are sometimes asked to participate in the development of student success programs as first-year math is an integral part of retention at NAU. Many on campus see the LMC as a unit with a high concentration of at-risk students and are eager to collaborate with us to design interventions to support these students. There should be time for questions and discussion.
