NAU

Sabbatical Report

Abstract: During my 2015-2016 sabbatical year, I had three main goals, mathematically speaking:

- 1) to wrap up some projects with undergraduate students and submit their work for publication,
- 2) to find some new/appropriate undergraduate research topics, and
- 3) to create as many FAMUS presentations as possible for future use.

In this talk, I will present the progress made toward these three goals. I will also show a few photos that describe some of the more interesting travel adventures that took place during the year.

Algebra Combinatorics Geometry and Topology (ACGT) Seminar meets every Tuesday, 12:45 – 1:45 pm, AMB 164.

Steve Wilson continues talking about Cayley graphs.

Applied Math Seminar (AMS) meets every Thursday, 12:45 – 1:45 pm, AMB 164, as announced.

Terry Blows begins speaking about population modeling.

Friday Afternoon Undergraduate Mathematics Seminar (FAMUS) meets Fridays, 3pm, AMB 164.
